

Round the square

How it works

Four players start at each corner of the grid with Player 1 having a ball at their feet.

Player 1 passes the ball to Player 2 and then makes a run towards the same corner as Player 4.

Player 2 controls the ball and then passes to Player 3.

After passing the ball Player 2 makes a run towards the corner where Player 1 started.

Player 3 controls the ball and then passes to Player 4.

After passing the ball Player 3 makes a run towards the corner where Player 2 started. Player 4 will then control the ball and pass to Player 2.

The drill continues with this repeated passing and moving sequence.

Challenge the players to keep the passing sequence going with no errors for 30 seconds/1 minute. Which group can keep going the longest without an error?

Possible changes

Player 4 could start with the ball and pass to Player 3 to reverse the direction of passing and movement.
